<i>About the Authors</i>	<i>xvii</i>
<i>Acknowledgments</i>	<i>xviii</i>
Chapter 1 The Logic Concept	3
1.1 Introduction	3
1.2 A Brief History of Logic Pro 9	4
1.3 The Logical Advantage	6
Complete Integration with Apple Hardware and Software	7
Exhaustive Range of Plug-Ins and Instruments	7
Effective Combination of MIDI and Audio Editing	7
Flexible Audio Hardware	9
Chapter 2 Logic's Interface	11
2.1 Introduction	11
2.2 What Logic Can Record	11
2.3 The Arrange Window	12
2.4 Editor Areas – Mixer, Sample Editor, Piano Roll, Score, and Hyper Editor	13
Mixer (Keyboard Shortcut – X)	14
Sample Editor (Keyboard Shortcut – W)	14
Piano Roll (Keyboard Shortcut – P)	15
Score (Keyboard Shortcut – N)	15
Hyper Editor (Keyboard Shortcut – Y)	16
2.5 Media and Lists Area	17
2.6 Inspector Area (Keyboard Shortcut – I)	19
Region Parameters	21
Track Parameters	21
Arrange Channel Strip	21

2.7	Transport Bar and Toolbar	21
2.8	Tools, Local Menus, and Contextual Menus	22
2.9	Adjusting How You View the Arrangement: Zooming In and Out	23
Chapter 3 Getting Connected		27
3.1	Introduction	27
3.2	USB Devices	27
	USB – An Introduction	28
	USB Audio Interfaces	28
	USB Controller Keyboards	30
3.3	FireWire Devices	32
3.4	PCI Express	34
3.5	Other Audio Equipment	35
	Microphones	35
	Monitors	37
	Headphones	38
	Outboard	39
3.6	Integration into Logic – Audio Preferences	39
3.7	Hard Drives	42
	SATA and Internal Hard Drives	42
3.8	Control Surfaces	43
3.9	Distributed Audio Processing and External DSP Solutions	46
	Using Multiple Macs	46
3.10	What Is MIDI?	46
3.11	Digidesign Hardware Integration with Logic	49
Chapter 4 Starting a Project		55
4.1	Introduction	55
4.2	Assets and Projects	56
	Save As...	57
4.3	Working with Tracks	58

Contents

Audio	59
Software Instrument	59
External MIDI	59
4.4 An Introduction to the Audio Mixer	60
Input Monitor (I)	61
Record Arm (R)	63
Mute (M)	63
Solo (S)	63
4.5 Using the Transport and Timeline	63
Bar Ruler	64
4.6 Your First Recording	65
Difference between Mix Levels and Monitoring Levels While Recording	67
4.7 Overdubs and Punching-In and -Out	67
Quickly Punching-In Material	67
Recording in Cycle Mode	67
Autopunch	68
Introducing Take Folders	69
4.8 Creating Further Tracks and Track Sorting	70
Creating Duplicate Tracks	70
Creating Tracks with the Next Instrument	71
Creating Tracks with Duplicate Settings	71
Sorting and Organizing Tracks	71
4.9 The Audio Bin and Importing	72
Importing Other Audio Files and CDs	72
4.10 Working with Apple Loops	73
Audio Files versus MIDI Files and Instruments	76
Importing Apple Loops into Your Session	77
4.11 Improving What the Artist Hears – Headphone Mixes	77
Monitor Mix	78
Cue Mix	78

4.12 Monitoring through Effects	80
Accounting for Processing Latency	81
Chapter 5 Audio Regions and Editing	85
5.1 Introduction	85
5.2 The Big Picture – Forming Your Basic Arrangement	86
5.3 Using the Inspector	87
5.4 Working with Loops, Copies, and Aliases	88
Making Multiple Copies	88
Loops	89
5.5 Precise Region Editing	90
5.6 Snapping – Understanding Your Editing Grid	90
Going Finer – Bypassing Snap and Nudging Regions	93
5.7 Resizing and Cutting Regions	93
Cutting a Region with the Scissors Tool	93
Topping-and-Tailing	95
Using the Marquee Tool	95
Snap to Transients	96
5.8 Fades and Crossfades	97
Using the Crossfade Tool to Create Fades	97
Changing the Drag Mode to Create Fades	99
Using the Fade Parameter to Create Fades	100
5.9 Speed Fades	101
5.10 Quick Swipe Comping	101
5.11 Expanding the Take Folder and Creating Basic Comps	102
5.12 Time Slipping a Quick Swipe Comp	104
5.13 Flattening or Merging a Comp	105
Unpacking a Comp	107
5.14 Flex Time Editing	108
Why Use Flex Time?	108
5.15 Flex Time View and Flex Time Modes	108

Contents

Slicing	109
Rhythmic	109
Monophonic	109
Polyphonic	110
Tempophone	110
Speed	110
5.16 Transient Markers and Flex Markers	111
Creating Transient Markers	111
Flexing Multiple Audio Events	111
Flexing Single Notes	112
Deleting Flex Markers	114
5.17 Quantizing Audio with Flex Time	115
Groove Templates between Regions	116
5.18 Separating Regions Based on Transient Markers	117
5.19 Freezing a Flex Time Track to Save CPU	118
5.20 Editing Multiple Tracks Using Edit Groups	119
Creating Edit Groups	119
Toggling Groups	121
5.21 Drum Replacement	121
5.22 Sample Editor Principles	123
Rendered “Off-Line” Editing	123
Accuracy	125
Additional Functionality	125
5.23 Sample Editor Applications	126
Reversing Audio	126
Accurate Region Resizing	126
Marking Anchor Points	127
Cleaning Up Unwanted Noise	128
Audio to Score	128
Time and Pitch Machine	129
5.24 Inserting and Deleting Sections of Your Song	130

5.25	Working with Tempo and Loops	131
	Follow Tempo	131
	Timestretching a Region to Fit	132
	Working Out the Tempo of a Region/Loop	132
	Matching Your Project's Tempo to an Imported Loop	132
	Beat Mapping	134
5.26	Managing Your Audio Files and Regions	137
	The Audio Bin Tab versus the Audio Bin Window	137
	File Management	138
	Copy/Converting Files	139
	Viewing the Bin and Grouping Files	139
5.27	Using Folders and Hiding Tracks	141
	Packing a Folder	141
	Viewing a Folder's Contents	142
	Hide Tracks	143
Chapter 6 MIDI Sequencing and Instrument Plug-Ins		145
6.1	Introduction	145
6.2	MIDI Concepts	145
6.3	Creating Instrument Tracks	146
6.4	Instantiating Virtual Instruments and the Library Feature	147
	Browsing Instrument Settings in the Library	147
	Using Channel Strip Settings with Instruments	150
	Changing the Instrument Parameters	151
	Changing an Instruments Icon	151
	Transposition and Velocity	151
	Key Limit	152
6.5	Working with External MIDI Instruments	152
	How Do I Monitor MIDI Sound Sources?	155
	What If I've Got More Than One External MIDI Device?	157

Contents

My MIDI Tracks Are Playing Back Slightly Late, How Do I Rectify This?	157
6.6 Making a MIDI Recording	158
Where's the Data?	158
Recording in Cycle Mode and Overdubs	158
6.7 Editing and Arranging MIDI Regions	161
Merging MIDI Regions	161
Working Without Fades and Crossfades	161
Timestretching MIDI Regions	161
6.8 Region Parameters: Quantizing and Beyond	162
Quantize	163
Q-Swing	163
Loop and Transpose	164
Velocity and Dynamics	164
Gate Time	164
6.9 The MIDI Thru Function	166
6.10 Advanced Quantization Options	166
Q-Strength	167
Q-Flam	168
Q-Range	168
6.11 Normalizing Sequence Parameters	169
6.12 MIDI Editing in Logic	169
6.13 The Piano Roll	170
6.14 Typical Editing Scenarios in the Piano Roll	172
Correcting Pitch	172
Correcting Timing	172
Duplicating a Phrase	173
Correcting Length Issues	174
Changing Velocity	174
Creating New Notes	176
Deleting/Muting Notes	177
6.15 Quantizing Inside the Piano Roll Editor	178

6.16	Working with Controller Data Using Hyper Draw	180
	Editing Velocity in Hyper Draw	180
	Editing Volume	181
	Editing Other Controllers, Including Filter Cutoff	181
6.17	Hyper Draw in the Arrange Area	182
6.18	Going Further: The Piano Roll's Edit and Functions Menus	183
6.19	Intelligent Selection: The Edit Menu	183
	Select Equal Events	186
6.20	Functions: Quick-and-Easy Note Modifications	186
	Note Overlap Correction/Note Force Legato (Functional > Note Events)	186
	Select Highest Notes, Select Lowest Notes (Functional > Note Events)	186
	Voices to Channels (Functional > Note Events)	187
6.21	Step-Time Sequencing	188
6.22	The Hyper Editor	190
	Editing and Creating MIDI Controller Data in the Hyper Editor	190
	Adding New Controller Types and Hyper Sets	192
	Editing Drums Using the Hyper Editor	193
6.23	Score Editor	193
6.24	Event List	193
	Filtering Events	195
	Modifying and Adding Events	195
Chapter 7 Creative Sound Design		199
7.1	Introduction	199
7.2	Logic's Synthesizers	199
	ES2	200
	EFM1	201
	Sculpture	201

Contents

7.3	Understanding the ES2	202
	The Oscillators (A)	202
	The Filters (B)	203
	Amplifier and Effects (C)	204
	Modulation Matrix (D)	204
	LFOs and Envelopes	205
7.4	Working with Oscillators	205
7.5	Filters, Amplifiers, and Modulators	210
	Cutoff and Resonance	211
	Changing Volume Over Time	212
	Bringing It All Together: The Modulation Matrix	213
7.6	Global Parameters and Output Effects	216
7.7	EFM1 and Frequency Modulation Synthesis	216
	Modulation on the EFM1	220
	Refining Your EFM1 Patches	222
7.8	Component Modeling: Sculpture	222
7.9	Objects	223
7.10	The String	226
7.11	Waveshapers and Beyond	229
7.12	Modulation and Morphing	232
7.13	Creative Sampling	237
	The EXS24 Hierarchy: Zones, Groups, and Editors	237
7.14	The EXS24 Instrument Editor	239
7.15	Creating a New Instrument and Importing Samples	242
7.16	Changing Zone Properties	244
	Key Range	244
	Pitch	244
	Vel. Range	245
	Output	246

Playback	246
Sample	246
Loop	247
7.17 Working with the EXS24's Groups	248
Advanced Mapping Options	249
7.18 Editing EXS24 Instruments Using the Front Panel	250
Basic Instrument Refinement: Velocity Scaling, Polyphony, and Envelopes	251
Adding in the Filter	251
Modulation Heaven!	252
Saving Instrument Settings	253
7.19 Ultrabeat	254
Chapter 8 Mixing in Logic	259
8.1 Introduction	259
8.2 Channel Strips: Understanding Your Virtual Console	260
Audio Channel Strip	260
Instrument Channel Strip	260
Aux Channel Strip	264
Stereo Output Channel Strip	265
MIDI Channel Strips	267
Master Channel Strip	268
8.3 Organizing Your Mixer: What You Do and Don't See	268
Mixer Views	269
Viewing by Signal Path	272
Dropping Out Sections of Your Mixer	272
8.4 Folders and the Mixer	273
8.5 Beginning a Mix	275
Basic Part Leveling	275
Applying Equalization and Compression	276
Adding in Further Plug-Ins	278

Contents

8.6 Adding Send Effects	280
8.7 Combined Processing Using Aux Channels	283
8.8 Using Groups	285
8.9 Working with Channel Strip Settings	288
8.10 Automation: The Basics	289
8.11 Track-Based versus Region-Based	290
8.12 Automation Modes	292
Write	292
Touch	293
Latch	293
Read	293
8.13 Viewing and Editing Automation	295
8.14 The Automation Menu Options	300
Chapter 9 Mastering in Logic	309
9.1 Introduction	309
9.2 Different Approaches to Mastering	309
Technique 1: iTunes	310
Technique 2: Burn from Logic	310
Technique 3: WaveBurner	311
9.3 Bounce to Disk	311
9.4 Audio Mastering in Logic	314
9.5 Editing Fades	314
9.6 Exporting and Burning	317
9.7 Mastering in WaveBurner	320
9.8 Processing and Editing	322
9.9 Dithering, Bouncing, and Burning	324
Chapter 10 Logic and Multimedia Production	335
10.1 Introduction	335
10.2 Managing Movies	335
Extracting the Movie Audio Content	338

10.3 Global Tracks	339
Markers	339
Detect Scene Changes	341
Working with Tempo and Signature Changes	342
Alternatives	345
Big Displays	346
Spotting Audio	346
10.4 Synchronizing Logic	348
Getting Locked	349
Being the Master	351
10.5 Score Editing and Music Preparation	352
Preparing Your MIDI Files	353
Opening the Score Editor	354
Adding Expression and Score Markings	355
Shrinking to Fit: Score Settings and Score Sets	356
Printing the Parts	357
10.6 Surround Sound in Logic	358
Getting Started	359
10.7 Delivery Formats	365
Bouncing to Stereo and Surround	365
Exporting to DVD	368
Exporting Video with Audio (Dubbing)	372
Chapter 11 Optimizing Logic	375
11.1 Introduction	375
11.2 Templates	375
11.3 Screensets and Windows	377
Link Modes	381
11.4 Key Commands	382
11.5 The Environment	384
Layers and Windows	384
Objects	386

Contents

Cables	387
Setting Up MIDI Instruments in the Environment	389
Live MIDI with the Environment	395
External Control with the Environment	396
11.6 Input/Output Labels	400
11.7 Nodes and Distributed Audio Processing	401
<i>Subject Index</i>	407
